

# Reduce Your Risk of Coronavirus

**Avoid close contact with anyone who is experiencing flu-like symptoms.**

**Clean your hands with soap and water or alcohol-based hand rub.**

**Cover your nose and mouth when coughing or sneezing. Use a tissue or a flexed elbow.**

**If you develop a cough, fever, or difficulty breathing and have traveled to mainland China in the past 14 days, seek medical care immediately. Call ahead to tell your healthcare provider about your travel and symptoms.**
